

Music Development Group: Meeting 6: 26th October, 2016

Agenda: <i>Student Presentation</i>	A group of 10 post-primary students attended this meeting. Each of the students highlighted an area of importance for them and following their brief statements, the development group had the opportunity to ask the students for clarification or to expand on their ideas.
<i>Classroom-Based Assessment 1</i>	The group was split into 3 smaller groups, and these groups had a combination of students and members of the development group. The task was to identify the format/structure/content of CBA 1: the composition portfolio. Feedback was collected on this and a discussion ensued on the points raised by each group.
<i>Learning Outcomes</i>	The group discussed a set of Learning Outcomes related to the Procedural Knowledge strand. This was an open group discussion and yielded some good feedback to help inform the next iteration of these learning outcomes.
