

LC Chemistry	Development Group Meeting 19, March 8th 2024. Short Description
Agenda Item	Notes
Early insights from the consultation	The Executive gave an update on the consultation and levels of engagement. Early insights were presented and discussed across the themes of the consultation. Manageability and then coherence reported as key areas for the Development Group to address.
Incorporating the feedback to the draft specification: manageability and coherence	The Development Group engaged in activities to address the feedback, and based on two sets of criteria. Topics and concepts removed or refined across all four strands of the specification including: atomic theory, radioactivity, gas laws, allotropy, hydrocarbons, Haber process and organic chemistry. Number of Experimental Investigations (EIs) reduced and the approach to other experimental activities to be clarified.
Next steps	The chair reflected on the work completed to date and thanked members for their attendance and contributions. Next meeting: April 15 th and 16 th 2024.
